

"hehhe sounds good.. i think there is some pretty good questions on this.. "

1/ Bonded by blood was the first Exodus album title, is this the all time best album for u and are you 80's thrashers?

1/well bonded by blood is a great album with some great thrash classics bonded by blood being one of our favorites on that album..Exodus was more of an influence on Aladdin he is the one who started the band from the ground up he kinda got the rest of us listening to them. Are we 80's thrashers? well thats hard to answer since most of us were born in the late 80's hahaha so we cant really say we are 80's thrasher more like thrashers for a new era!

2/ How long have you been together and did you find very quickly the kind of Thrash you would play?

2/Well the idea of this band has been floating around for some time now for about a year and a half but the whole band has only been together for about 10-11 months now. We never really thought of what thrash we would play we kinda just mixed every one influences in one

3/ How went your gigs so far? have you got opportunities to play with major Thrashers?

3/Our gigs so far have been great at first when we had no music people hardly came out..but once we put music on our Myspace it was overwhelming we have played some really good shows and some not so great shows every band has their days..we really havent played with a band thats really big but we have had the chance to play with the great Michael Angelo Batio a guitar virtuoso thats was in january.. we are a new band with great expectation so look for us later this yr we hope we get to play with some greats

4/ Your logo is very much inspired by Iron Maiden&Overkill , got any critics on that?

4/yes our logo is inspired by many great bands maiden megadeth metallica and so many more we really have not had any criticism on it many people love it so we go with it.

5/ You had a bloody cold winter in CA, is it stopping you for rehearsing?

5/aaahh its pretty cold out here now its pretty hard on us since we are used to the sunny days that california brings us.. but we dont let this stop us no way no how.We have been practicing inside our guitarist house which keeps us a little warmer until this goes away

6/ have you got an album ready ?

6/good question we actually have had a great response with our demo.. we are working on our first self released album coming out late 2007 we are currently working on new material for this album so we have kind of stopped playing alot of shows in order to get this new material on its way to the recording studio

7/ What are your equipment?

7/Equipment well thats a long list of stuff so im going to make it nice short and simple..

8/ you seem pretty young? how did you come to Thrash Metal?

8/Yes we are pretty young but we didnt come to thrash it came to us we are all into different kinds of metal not just thrash but thrash is where we all meet.. we try to put all our influences in one style of music and the end results is what u get.

9/ Is ORGY a real song or just a fun you play live? does it really sound like a song?

9/Orgy!! haha lots of people ask us about this and to believe it i guess you would have to see it live we have had so many versions of it.. I wouldnt really call it a song more like a technique One guitar player does a progression and we play each others guitar/bass.

it sounds just like the song we are playing depends on the song.. its more of a show thing but it gets the crowd going i think we pull it off pretty well

well thanx for the questions i hope we didnt bore you

KEEP IT BRUTAL!!
