

1. How long Meggido has been existing?! for what I see you started to get heard since your min CD "Surface" which is a very good name for underground Metal band, this Cd is very powerfull and really good do you think this is the music that makes you suddenly getting heard by the masses?! Or your dedication to the music you play and the immense publicity you are doing to promote yourself?!

1) MEGGIDO started life in June 1999. The music we play comes from the four of us messing around in rehearsal, although our influences started with 70's rock. At the moment we are really lucky that everyone at TOTAL-ROCK Radio station loves what we are doing and are more than happy to play it on air.

2. For the people who never saw you live and i can tell for myself you are ten times powerfull on stage than on your cd, how do you get this strength?! are you very motivated?! Do you all drink gazoil?! what 's your secret to get such a power, an energy that kicks you down on the floor, even yourself end on your knees to finish the set...?! come on give us a bit of the magic potion you are taking!

2) The essence of our live performance is that we enjoy playing in front of an audience, and we go out with an attitude of "Take no prisoners" and to wipe the floor with any other act on the bill.

3. YOU are the last member to be added to the line up, you are the front man on stage and deals with all of the web site things, are you the most motivated or it was your contract when you entered the band to have to do what others probably done before you join?!

3) This is me being me, and being the only one with lots of spare time on my hands.

4. can we say that Meggido is a Fetish band?! Or are you the only perver in the band?! You apparently put this into the site and you all wear leather on stage... I saw you one day almost doing a blow job to the guitarist when he was playing guitar... Or is it just the Metal image for the stage act and you all wear suits in your day life?!!!

4) No we are not really a fetish band, we just love leather, latex and PVC (oh er Missus). None of us wear suits in our day jobs, but people come to see a show and so we try to put one on.

5. I've heard you have a bar?! are you the boss?! is it your own business or just a place you are well known and accepted?!

5) Yes, I co-run a bar and is well known as the best metal pub in town.

6. Evey body who get in touch with you will hear from the "hairy man" , you are not the only one to have long hair where comes from this name, did you just choose it for yourself or you spend your time in front of the mirror before getting on stage so the other members gave you this title?!

6) Because I have always had long hair, it's a name that i seem to have been stuck with.

7. YOU say on your site that your guitarist has known Nikki Sixx, did he play in a famous band before and have been in the business for a while?! did he started Meggido?! Is he English, and so can you tell us what have been the music life of all of the members...

7) Someone seems to have mixed us up with someone else, as our guitarist comes from Nottingham. The guitarist started the band with the drummer who have both had some success in the past. Some of us have had a long and varied history in metal that to name everything we have done would run into a book.

8. What made you joining the band?! did you see them live with the other singer ?! did you know the guys personally ?!

8) I was asked by the drummer who I have known for ten years, and saw the old singer with their previous band a couple of times. But basically the chance came along and I was hungry to give it a shot.

9. Did you have to learn all of the old lyrics or you just started fresh with some new songs you all composed together?

9) When I joined, we started a fresh, so I was allowed to come up with whatever entered my mind.

10. What are your main bands you really listen to a lot and take your influences from or not?!

10) You name it and I listen to it. I do not consciously take any ideas from other bands.

11. YOUr music got so many influences, we can hear real old Metal bands from Hard rock, Heavy, Thrash... and mixed with some great Rock 'n Roll touches. Do you listen to the bands together studying how other bands makes it good and just take the riffs or passages that made great song and mix them together to get at the end the receipt of Meggido Power?!!!

11) We do what we do and generally jam ideas at rehearsal, then we tape them and then spend a couple of weeks getting the arrangements right.

12. YOU have a song called Power and it describes your music quite very well, is there a medicine out there in a Sex shop called "Meggido Power"?! What do you think of what the media call "Power Metal" and actually got less Power than any Metal bands like yours?! What's your belief of human power and is it the way you try to explain it in your lyrics?! How do you write lyrics?! want to tell about your new CD?! Some power to add to this interview for the end?!

12) At the moment there is nothing on the market called 'Meggido Power', please don't give our manager any ideas, he comes up with enough as it is.

'Power Metal' is very open to interpretation and each band will see themselves differently to how the media present them. 'Human Power' is very important as each and every individual has it within themselves to be whatever they want to be, providing they truly 'Believe in the Power'. My lyrics come from my experiences and observations over the years.

The album sounds alot heavier than 'Surface' at the moment and we have finally settled on the 11 songs that will make the final cut. We are going to call it 'Seizure Day' as it has nearly given us all heart attacks, and so seems most appropriate. Produce Andy Faulkner had just finished working on the latest BOLT THROWER CD when we began the Album and so we are going to spend three months putting it together so that he can have a couple of weeks holiday in the middle to recharge his batteries.

Songs that will make the final cut are 'Embrace the Pain', 'Candle Burns', 'Through this Dismay', 'In your Veins' and 'Desire'. Other song titles are yet to be finalised.
